

SAP Analytics Cloud QRC3 2026 — Starter Kit

What changed, what to do with it, and which template to try. SAP tells you what's new; this shows you what to build. Independent project, not affiliated with SAP SE.

1 • Post-upgrade checklist

- Preview on a private test edition tenant before it hits production users.
- Re-validate your critical stories (rendering, filters, scripting) against the new version.
- Run one critical Data Action on a copy — confirm the filtered scope is unchanged.
- Confirm whether the AI features are licensed on your tenant (AI-units entitlement).
- Check model hygiene: consistent aggregations, no orphaned dimension members.
- Try the new Quick Builder for Charts on one existing chart.

2 • Feature → use case → template

QRC3 feature	Use it for	Template to try
Funnel chart	Pipeline / conversion drop-off, stage-by-stage attrition	Conversion funnel
Gauge chart	KPI vs target tiles on summary dashboards	ESG scorecard (KPI tiles)
Sankey chart	Flow: budget allocation, resource / customer journeys	Annual budget
Compass simulation	Planning scenarios and risk ranges	Rolling forecast — 12-month
AI Prompt Insights	On-chart commentary, risk flags, structured analysis	Any story with a table/chart
Smarter Data Action filtering	Cleaner planning writes with less scripting	Rolling forecast — 12-month

Templates are free at sactemplateshub.com/catalog — no sign-up.

3 • The authoritative SAP sources

Rollout is staggered and some features are licence-gated, so confirm exact availability for your tenant in these two SAP sources:

- SAP Roadmap Explorer — roadmaps.sap.com
- In-product What's New Viewer (filter by version / category)
- SAP Community QRC3 2026 sneak peek (announced scope)

4 • Next to watch

QRC4 2026 is scheduled for 14–15 November 2026. Same pattern: read the notes, test what touches your models, and check the recap at sactemplateshub.com/releases.
